

GAME DESCRIPTION

Get ready to play «4 Numbers» by Platipus, the exhilarating mini-game where a few symbols decide your destiny!

Numbers from 0 to 9 appear on reels 1, 2, and 4, while reel 3 features either a zero or a dot, offering a maximum multiplier of x9909. When all four reels show numbers, the first reel represents thousands, the second reel hundreds, the third reel tens, and the fourth reel individual numbers. These numbers combine to form a winning multiplier. If the first reel shows zero, the multiplier starts from the second reel, and so on.

If the third reel shows a dot, it acts as a decimal point. In this case, the first reel represents tens, the second reel whole numbers, and the fourth reel decimal digits. Your win is calculated by multiplying the number on the reels by your spin amount. If all reels show zero, the multiplier is 0, resulting in no win. See what fortune awaits you in the thrilling «4 Numbers» game!
