

A long-awaited Platipus European Roulette is finally here! This beautiful and simple table game brings you a feel of a real brick and mortar casino right to the comfort of your own sofa. As expected from European Roulette Table, there are 18 red and 18 black pockets with a single green zero to spice things up.

When the game loads, a player is presented with a classical betting table with inside and outside bets while the wheel is slowly spinning in the foreground. Unlike in the real life, there is no need to hurry, the game will not start until the player is ready and the bets are made.

This amazing game also supports “racetrack bets”. In the lower left corner a player can find a smaller table that is called the Neighbours Table. Clicking on it, will replace the betting field with one that offers a slightly more complex betting options. Once all the bets have been placed, a player need only hit the spin button to literally get the ball rolling. The spin button also acts as repeat button, so, if no bets were placed, hitting this button will replicate previous round’s bets.

Originating from 17th century France, European Roulette has acquired a worldwide popularity and became a must-have game for any respectable establishment.

Capture the feel of brick and mortar casino and convenience of online-game. Let your players enjoy putting their chips against the wheel with the all-time classic Platipus European Roulette.
